Our Client.

Clients are the most important entities in any domain. Thus, Cavalier believes in delivering products that cater to specific customer requirements. This has helped us to develop and retain business relationship with the following clients in India and abroad.

Cyklop CM700 Series CIJ Printer

As an authorized distributor for the globally recognized 110-year-old Cyklop Group, Cavalier Enterprises brings world-class Continuous Inkjet (CIJ) coding and marking solutions directly to your production floor. No Lock-In Periods, Intuitive 10-Inch Touchscreen, Make-Up Consumption Saving System, Single Filter Module and Zero Mandatory Maintenance.

Cyklop CM600 Series TIJ Printer

Our cutting-edge coding systems enable quick and effortless printing of barcodes, batch markings, address information, or logos. A high-resolution 7 inch touchscreen, Data Printing, Fiber Optic Product Sensor, Anti Shock Bracket. High-speed printing secondary packaging in food, beverage, cosmetic, pharmaceutical, and extrusion industries.

LINX TTO Printers

Our range of Thermal Transfer Overprinters (TTO) provides an ideal solution for printing on flexible packaging across a wide variety of industrial applications. Designed for printing on film packaging, plastics, labels, gloss cards, and other flexible materials, these printers deliver high-quality, reliable, and efficient printing performance.

We're Cavalier Enterprises, and we're proud to be innovators of the highest standard, using cutting-edge technologies to lead the industry forward.

Bentsai E60 Series TIJ Printer Online

The Bentsai B85 handheld printer is a versatile large-character printing solution with an adjustable print height from 2.5mm to 92mm and up to 40 lines. It can print text, dates, serial batch numbers, QR codes, DM codes, barcodes, designs, pictures, and variable information on various surfaces, including cardboard, wood, plastic, and metal.v

CE100 Series TIJ Printer Online

The CE150/ CE200 TIJ online inkjet printer is a versatile coding and marking solution designed to support both 12.7 mm and 25.4 mm ink cartridges on the same unit simply by changing the print head plates. This system is ideal for printing text, batch numbers, expiry dates, logos, bar codes, QR codes, GS1 codes, and variable data.

Bentsai Handheld TIJ Printer

BENTSAI 6205B and 6205BL handheld printer guns with the ability to print the finest characters at just 0.8mm to 12.7mm the tallest, these printers can meet the demands for businesses seeking small character coding and marking with ease. Print on almost any porous and non-porous surfaces, including wood, cardboard, plastics, glass, fabric, ceramic, metal, etc...

CE Series Lightweight TIJ Handheld Printer 12.7 & 25 mm

Enjoy smart and efficient printing with Wi-Fi APP wireless control for easy operation, real-time printing cost calculation for better expense management, and a smarter intelligent embedded FreeRTOS system for stable performance. It also features flexible variable database functions to meet various application and traceability requirements.

Cyklop CO2 / Fiber / UV Laser Printer

CM 800 series CO2/Fiber/UV laser marking system help customers achieve high-quality and high-speed printing. The printing content is flexible, not restricted by fonts, coding or graphics. It is an ideal solution for high-speed in food, beverage, cosmetic, pharmaceutical and extrusion industrials. Non-stop: up to 40,000 hours of printing

Bentsai B85 Printer For 100mm Printing

The Bentsai B85 handheld printer is a versatile large-character printing solution with an adjustable print height from 2.5mm to 92mm and up to 40 lines. It can print text, dates, serial batch numbers, QR codes, DM codes, barcodes, designs, pictures, and variable information on various surfaces, including cardboard, wood, plastic, and metal, making it ideal for industries.

Cyklop LGT 260 Battery Operated Strapping Tool

The LGT 260 is the cost-effective entry-level battery strapping tool. The LGT 260 combines all necessary operations – tensioning, closing and cutting – in one device. The strap tension can be set variably, up to 2800N. This ensures that the device is extremely suitable for strapping in the paper, logistics, metal, wood or construction.

Cyklop Semi Automatic Strapping Machine

The M-Pac V is the latest semi-automatic strapping machine from Cyklop. The M-Pac V is used for strapping various packages with PP strap. The machine has a direct drive with fewer moving parts and therefore lower maintenance costs. The M-Pac V is a silent strapping machine (57 dB) and therefore also suitable for use in an office environment.

Cyklop Automatic Strapping Machine

The automatic strapping machine Ampag Speed is suitable for strapping various packages and products such as boxes, postal packets and newspaper bundles. The Ampag Speed stands out for reliability, ease of operation and low maintenance requirements. The Ampag Speed is very fast, achieving up to 65 strapping cycles per/min.

Elastic Binder: AXRO FQC3

The FQC3 elastic binder sets a new benchmark with its exceptionally high speed (7,000 bundles per hour), outstanding reliability, and efficiency within any processing line. Fully controlled movements and the proven, optimized AXRO knotting mechanism, it delivers consistently perfect bundling results, even under peak loads.

Cyklop Semi Automatic Case Sealer Machine

The CT 403 SD semi-automatic case sealer is a versatile box sealing machine built to increase productivity and efficiency in modern packaging operations, warehouses, and distribution centers. Featuring side-driven belts, adjustable handwheels for multiple box sizes, and advanced top and bottom tape heads, it delivers fast.

Cyklop Stretch Wrapper

The stretch wrapper CTT 210 is a film-wrapping machine that is simple and quick to operate: the operator places the pallet on the turntable, switches on the wrap programme and cuts off the film when the pallet has been wrapped. Simple and fast to operate, Pre-stretch 80% – 145% – 235%, Wrapping speed 12 rpm.

CE90 Semi Automatic Strapping Machine

CE90 OEM semi automatic strapping machine is suitable for cartons, calcium-plastic cases, books, soft and hard packages as well as all kinds of articles in square, cylinder or annulations. CE90 is suitable for general objects and widely used in various fields like light industry, foodstuffs, foreign trade, printing, medicine, post etc.

Cyklop Semi Automatic Case Sealer Machine

Cavalier's OEM carton sealing machine are mainly used when sealing and packaging carton either individually or as part of a production line depending on the unit required. These sealers are widely used in the fields of electrical domestic appliances, textiles, foodstuffs, general merchandise, medicine's, chemical industry.

CE Semi-Auto Stretch Wrapping Machine

CE 800 semi-auto stretch film wrapping machine is specially designed for packing small and medium sized objects packed in carton box or directly palletized onto the rotating platform without pallet. And the top plate is one option for the unstable goods and ensure it safety packing. The machine is widely suitable for goods with light weight.

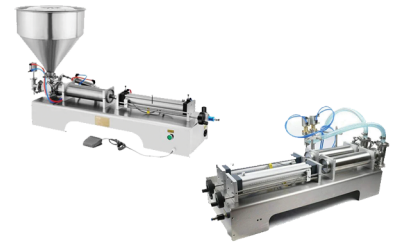

CE Band Sealers

FR series continuous film sealing machinery finish continuous carrying, sealing and printing in one operation. The machine can be made horizontally, vertically or with stand feet. It adopts electronic constant temperature mechanism and stepless speed regulating transmission motor.

CE Vertical Band Sealer

Verticle Band Sealer automatic plastic film sealing machine adopts electronic constant temperature control and automatic conveying device, can control different shapes of plastic film bags, can be used in all kinds of packaging line, the seal length is not limited. Sealing machine widely used in: food, pharmaceutical aquatic, chemical and electronics industries.

Semi Auto Paster Filler Machine / Doule Nozzle Liquid Filler

Filling volume is easily adjustable. Easy to operate and maintain. Uses high quality pneumatic and steel components. Manual and semi-automatic options available. Easy to dismantle and clean. One nozzle 400L/MIN 0.6Mpa 10-1000ml, 600-1500Bottle/Hour.

Pouch Filling Machine

This automatic liquid filling machine is designed for efficient and accurate filling of products such as milk, water, juice, oil, honey, shampoo, yogurt, glue, and other viscous liquids. Suitable for bottles, pouches, and stand-up pouches, it features dual filling nozzles, PLC control system, stainless steel 304 construction, and high filling accuracy.

Semi Auto Round Bottel Labelling Machine

This machine suitable for round bottle, circular tank, cylinder self-adhesive labeling, suitable for PET bottles, plastic bottles, glass bottles, metal bottles round bottle labeling, widely used in cosmetics, food, beverage, pharmaceutical and other industries, greatly enhance the productivity and quality labeling.

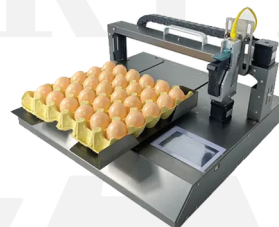

Automatic Round Bottle Labeling Machine

Introducing the Table Top Automatic Labeling Machine: Streamline Your Labeling Process with Precision and Efficiency Are you tired of spending countless hours manually labeling your products? Look no further than our Table Top Automatic Labeling Machine. Designed with cutting-edge technology and this machine is the ultimate solution.

Can Seamer

Made of new food-grade PET material, BPA-free, non-toxic and odorless. Directly safe for food contact including dry goods, sauces, grains, flower tea, honey, powder, etc. Ideal for both household and commercial use. Large bottle mouth for fast filling, no jamming, easy to clean. Suitable for granules, powder, paste, liquid and more.

Eggs Scanning Tray Printer

This printer offers efficient and flexible marking with 1-6 printing lines and character height from 1 to 12.7 mm. It supports multiple colors (black, red, blue) and prints numbers, barcodes, and logos with a 2-5 mm printing distance. With a 42 ml ink capacity and 220V power supply, it delivers high performance of up to 20,000 eggs per hour.

6 Heads Egg Printing Machine

High speed full plate spray printing way, regardless of what kind of arrangement can automatically identify the eggsand directly indicate the manufacture date on the egg and anti-counterfeiting marks, green food, health, safety and environmental. With computer control special shuttle transmission device, fast, efficient and accurate!

Conveyor Belt System

This conveyor belt system operates on AC 220V/50Hz with low power consumption of 90W, ensuring efficient performance. It features a uniform transport speed of 0-30 m/min, a durable PVC belt with 190 mm width and 2 mm thickness, and a sturdy design weighing 8 kg. The machine size is 1500×250×750 mm, with an adjustable base height for flexible operation.

Stacker Conveyor System

Belt Stacker And Feeder Conveyor For Batch Coding,High Speed Stacker Conveyor. Model- NAT-4 Voltage- 220V/50HZ Power-120W Product size 80mm*280mm Thickness-0.02-5mm Machine speed- 40m/min Size-1380*480*400mm Weight 32kg

Direct Heat Pedal Sealer

Direct Heat Pedal Sealer with heavy duty Aluminum body & sturdy design for sealing all types of bags or filled pouches of tea, snacks, etc. keeping hands free & avoids spills during sealing process. Auto heat cut-off feature saves electricity & protects operator from electric shock. Adjustable timer with seal completion buzzer.

Nitrogen Vacuum Sealing Machine

This Vacuum Packing Sealer is suitable for vacuuming small products, such as soy sauce products, meat products, condiments, preserved fruits and the products made from beans in food industry, chemical products, granule medicines and electronic elements.

Semi-auto Vacuum Bag Sealing / External Vacuum Machine

A vacuum packaging machine puts product in a film bag, de-aerates the bag by decreased pressure in a vacuum chamber, and seals the bag. It prevents discoloring of product and heightens display effect. To avoid smashing, those with a gas-inflating function are available. The vacuum chamber is made of food grade stainless steel.

Double Chamber Vacuum Packing Machine

This street light features high brightness, energy saving, environmental protection, and easy installation. It has a waterproof rating of IP67 and has passed CE certification. It is suitable for schools, parks, roadsides, factories, squares, etc. It has a warranty period of 3 years. Moreover, we can provide various styles to meet your needs.

Automatic Auger Filler Pick & Fill Seal Machine

Suitable for packing products such as spices, flour, milk powder, protein powder, coffee powder, detergent powder, chemical powders, and other free-flowing or non-free-flowing powders, the machine offers reliable performance for food, pharmaceutical, chemical, and FMCG industries.

Thermal Shrinking Packaging Machine

Thermal Shrinking Packaging Machine 4525 is a heavy-duty shrink tunnel equipped with glass infrared heaters, providing fast, uniform heating for a wide range of packaging applications. Its 18-inch wide and 12-inch high chamber accommodates a variety of box and bottle sizes, making it ideal for mid-to-large scale shrink operations.

Automatic Round Bottle Labeling Machine

Introducing the Table Top Automatic Labeling Machine: Streamline Your Labeling Process with Precision and Efficiency Are you tired of spending countless hours manually labeling your products? Look no further than our Table Top Automatic Labeling Machine. Designed with cutting-edge technology and this machine is the ultimate solution.

Web Sealer with Shrink Wrapper

Straight Line Automatic Sleeve Wrapper Bundler Comes Standard with a Straight Line Infeed Belt Conveyor which can Operate Totally Automatically Receiving a Continuous Stream of Packages, a 650 mm Long PTFE Coated Sealing Bar with 300 mm Max. Packing Height and a High Output Up to 15 Pcs/min.

Powder / Granule Filler

This compact weighing machine supports a weighing range of 1-50g / 1-100g with a production capacity of 8-10 pcs per minute. Operating on 220V, 50Hz power supply, it delivers reliable and efficient performance while maintaining a lightweight design of 10 kg, making it suitable for various industrial and packaging applications.

5KG Particle Filling Machine

The machine is operated through an automatic microcomputer control system for scientific weighing and filling process. Through efficient vibration, the vibrator inside the machine fastens the filling speed and makes the filling material smoothly flow and do not stick to each other. Improve the filling accuracy.

110g Side Sealer FFS Machine

The FFS 100 Gram Side Sealing Machine is a high-quality packaging solution designed for efficiently sealing bags with a capacity of up to 100 grams. This machine is perfect for small to medium-sized businesses looking to streamline their packaging process with precision and ease. Ensure the freshness and security of your products with this Machine.

Auger Filler Machine

Auger Filler Machine is used for stuffing Machine. Auger product is also known as partial automated powder product which is used to complete precise body weight size powder in containers and pockets. This product is powder filling devices which is set to complete various types of powder.

Induction sealer Economic Type 20-80mm

Compatible with bottle caps ranging from 20MM to 80MM, making it ideal for various container sizes in food, beverage, pharmaceutical, and cosmetic industries. Seals containers quickly and uniformly, increasing productivity in packaging operations. Features simple controls and adjustable settings.
